Body World leads us into a future where America has been torn apart by a second long and bloody civil war. The chaos continues, and the only hope for a relatively normal lifestyle seems to be within protected communities like Boney Borough. This is where our hero, Paulie goes in search of a better life (or a better scam). What he finds instead is a strange plant, a beautiful and elusive professor, a young couple in love (that goes completely wrong) and a neighbouring town that seems to be moving mysteriously closer and closer. As the story progresses, the inhabitants of Boney Borough begin to completely lose their mind. And that's where the fun begins...
