We're sure you've heard this once before: they say that, when you're about to die, your entire life flashes before your eyes, just like a movie...

Well, recent neurological research has allowed us to establish that this is absolutely true!

And — what we're sure will interest you even more — we've developed a technology that allows us to record this film!

Now you can have access to the thoughts, even the dreams, of the deceased!

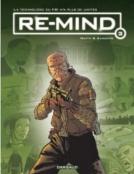

In short, you can know EVERYTHING about a person's life.

We call this new technology 'Re-Mind'!
