In the late 2000s, the rise of social media rang the death knell of privacy. Sixty years later, the proliferation of mass surveillance has become the norm, in the name of law and order. And everyone has bought in... or almost everyone. When Adil, a young student from London, learns that his younger sister, Laurette, has been working with a group of rebels aiming to attack an important data processing center, he's completely at a loss. But when she disappears shortly after the attack, kidnapped by an unknown agent, he soon becomes involved himself, as his life transforms into a science fiction novel

before his very eyes...
