This is factual and educational comic based on the life and discoveries of Marie Curie, a major scientific figure of the 20th century, was published to mark the centenary of the day she won the Nobel Prize for Chemistry. This inspired comic is set at the time she received her second Nobel Prize, when a vicious press campaign was launched against her, denouncing her affair with the physician Paul Langevin. Through her flash-backs, we're invited to witness the key moments of this exceptional woman's life and work, already exceptional in its own right and even more so considering the presence of women in the field of research at the time.
