A group of former CIA agents, specialists in post-September 11th terrorism, reform their elite team to help bring a conservative president back into power. Operating with complete disregard for the laws of God or man, they need two things in order to attain their goal: a new "national enemy" to declare war against — and a lot of money. Manipulation, stalking, kidnapping and torture are combined with sub-orbital launches, high luxury, and cutting-edge technology to create this scintillating drama.
