Bob is inconsolable ever since the death of his faithful companion, Rick, crushed by a meteorite while reporting from the Moon. But Rick comes back to help him solve the ultimate mystery, a mystery that will totally shake up his conception of reality. In the quantum world the concept of life and death is of little importance. Quantum physics is all around us, both in the infinitely large and in the infinitely small. But what it says about the world around us is different to our everyday perception of it. The reader will meet Max Planck, Albert Einstein, Prince de Broglie, Heisenberg, Erwin Schrödinger, Niels Bohr, Max Born, Hugh Everett III. A mind-boggling tale!
