'Our future is in the hands of the past'. So runs the motto of the Ukronian agents. Their mission: to protect History from modifications that could lead to time travel or, failing that, to guide events as closely to their official course as possible, in order to prevent the future of Mankind from being compromised. It's a dangerous task, and one that can often require great sacrifices.

In this series

Il faut sauver l'USS
Enterprise

La grande armada

1492. À l'ouest rien de
nouveau
