Famous in the scientific community but barely known to the public at large, Joseph Fourier was a mathematician who lived an illustrious, storied life. After fighting in the French revolution, he explored Egypt during the Napoleonic expeditions and went on to found the University of Grenoble.

Music, photography, lasers, telecommunications: these are just some of the fields indebted to the work of Joseph Fourier. Discover his incredible life, presented here in a Docu-Comic: comic pages along with documentary evidence offer in detail the fruit of his research and explain the historical context.
