A thriller full of eroticism, art, cybernetics and terrorism, following the lives of two sisters going by the name of Monika. One of them puts herself at the mercy of events, never really knowing where life will take her. She disguises herself in order to go and live her life with strangers, only truly showing her true self to a robot that fascinates her. The other seems to know everything, control everything, clearing out anyone involved in a potential terrorist movement. Project Monika brings the two rival sisters face to face. The events reveal to each other who they really are, and they aren't necessarily what we thought they were...
