It was at the end of the 1960s that Walthéry, Peyo's assistant at the time, drew the first outlines of Natacha on paper. He created a few pages, which he submitted to the publisher Dupuis. The publisher immediately accepted the project: at the time, there were not many real heroines, since women were systematically relegated to the role of foil for the great, handsome and strong masculine heroes.

### In this series

Chanson d'avril

Sur les traces de  
l'épervier bleu

L'Épervier bleu

Le regard du passé
