'Celebrating Easter before Palm Sunday', is the traditional expression evoking a pregnancy started before the celebration of marriage... For the Vernet 'clan', this expression takes on its full meaning when one knows that every Easter Sunday the family gathers around the matriarch, and it is obvious that on this day the tension accumulated may lead to crisis. Brothers Thomas and Christophe, the two 'heirs' of the family history, have always had a difficult relationship, between affection, jealousy, rivalry... Christophe's wife Suzanne, isolated for thirteen years in the silence of incredible pain, will regain consciousness following a car accident. A blessing or a new stroke of fate? Step by step, chapter by chapter, Suzanne, will pick up the thread of her life and will finally confront her terrible secret.
