Crazy, unpredictable, hilarious, and totally vulgar, the Rabbids continue to terrorize the world with their infuriatingly funny parodies. Millions of people, adults and children, boys and girls, have fallen under their spell. Having already invaded video games, gaming exhibitions, the internet and a multitude of merchandising, they have now pushed their way into the world of comic books, completely breaking all the codes of the 9th art. In their new playground, they'll edge their way just a little further into our everyday lives...
