It all started just before the Great War of 1914-18. In a climate of international tension, Victor Sackville, a spy for George V, received a mission to infiltrate the network of enemies, to try to block the death machine that is threatening Europe. After numerous missions during the Great War, we find Victor Sackville still in the service of the English Crown. During the 20's, numerous adventures lead him to all the hot spots around the world.
